1. Entity-Relationship Overview

2. Tables

Profile

- Org user, node in the reporting hierarchy.

Column	Type	Constraints	Notes
id	String	PK, default cuid()	Stable user id used across relations
name	String	NOT NULL	Display name
email	String?	UNIQUE	Login + email notifications (may start @qms.local in seed)
passwordHash	String?	—	Bcrypt/argon hash; never returned by APIs
roleTitle	String	NOT NULL	e.g. Director, Deputy Director, Quality Lead
reportsTo	String?	FK → Profile.id, onDelete SetNull	Manager; NULL ⇒ top authority
active	Boolean	default true	Inactive profiles cannot log in
canManageCommittees	Boolean	default false	Committee-management permission (Director grants)

createdAt	DateTime	default now()	—
-----------	----------	---------------	---

Indexes: `@@index([reportsTo])`

Document			
Column	Type	Constraints	Notes
id	String	PK	—
title	String	NOT NULL	—
assignedTo	String	FK → Profile.id, onDelete Cascade	Record assignee
status	String	NOT NULL	Draft → Pending → Approved
revision	String	NOT NULL	Doc revision label ("1", "2", ...)
updated	DateTime	default now()	—
deletedAt	DateTime?	—	Soft delete flag

Indexes: `[assignedTo]` , `[deletedAt]`

Capa			
Column	Type	Constraints	Notes
id	String	PK	—
title	String	NOT NULL	—
assignedTo	String	FK → Profile.id, onDelete Cascade	—
priority	String	NOT NULL	High / Medium / Low styling
status	String	NOT NULL	Draft / In progress / Done / Approved...
dueDate	DateTime?	—	Overdue computation supports dashboard
createdAt	DateTime	default now()	—
deletedAt	DateTime?	—	Soft delete

Indexes: `[assignedTo]` , `[deletedAt]`

Nonconformance			
Column	Type	Constraints	Notes
id	String	PK	—
title	String	NOT NULL	—
assignedTo	String	FK → Profile.id, onDelete Cascade	—

source	String	NOT NULL	Origin of the nonconformance
severity	String	NOT NULL	High / Medium / Low
status	String	NOT NULL	Draft → Pending → Approved...
date	DateTime	default now()	–
deletedAt	DateTime?	–	Soft delete

Indexes: [assignedTo] , [deletedAt]

Audit

Column	Type	Constraints	Notes
id	String	PK	–
title	String	NOT NULL	–
assignedTo	String	FK → Profile.id, onDelete Cascade	–
status	String	NOT NULL	–
date	DateTime	default now()	–
deletedAt	DateTime?	–	Soft delete

Indexes: [assignedTo] , [deletedAt]

Training

Column	Type	Constraints	Notes
id	String	PK	–
employee	String	NOT NULL	Training subject/employee
course	String	NOT NULL	Course name
status	String	NOT NULL	Not started / Active / Done...
dueDate	DateTime?	–	Overdue training metric
assignedTo	String	FK → Profile.id, onDelete Cascade	–
deletedAt	DateTime?	–	Soft delete

Indexes: [assignedTo] , [deletedAt]

Committee

Column	Type	Constraints	Notes
id	String	PK	–

name	String	NOT NULL	—
description	String?	—	—
createdBy	String	FK → Profile.id, onDelete Restrict	Creator is always a valid profile
createdAt	DateTime	default now()	—

Indexes: [createdBy]

CommitteeMembership

- Join Profile ↔ Committee; role is head or member.

Column	Type	Constraints	Notes
id	String	PK	—
committeeId	String	FK → Committee.id, onDelete Cascade	—
profileId	String	FK → Profile.id, onDelete Cascade	—
roleInCommittee	String	default "member"	"head" "member"
joinedAt	DateTime	default now()	—

Unique: (committeeId, profileId) • Indexes: [committeeId], [profileId]

CommitteeTask

Column	Type	Constraints	Notes
id	String	PK	—
committeeId	String	FK → Committee.id, onDelete Cascade	—
title	String	NOT NULL	—
description	String?	—	—
assignedTo	String	FK → Profile.id, onDelete Restrict	Assignee (must be committee member)
assignedBy	String	FK → Profile.id, onDelete Restrict	Assigning user
status	String	default "assigned"	assigned → in_progress → submitted → approved
dueDate	DateTime?	—	—
createdAt	DateTime	default now()	—

Indexes: [committeeId], [assignedTo], [assignedBy]

RecordHistory

- Append-only audit log, polymorphic over all five record modules.

Column	Type	Constraints	Notes
id	String	PK	—
recordType	String	NOT NULL	documents capa nonconformances audits training
recordId	String	NOT NULL	Target record id (polymorphic)
fromStatus	String?	—	Previous status
toStatus	String	NOT NULL	New status
changedBy	String	NOT NULL	Profile id of actor
comment	String?	—	Optional note
createdAt	DateTime	default now()	—

Indexes: [recordType, recordId] , [changedBy]

Comment

Column	Type	Constraints	Notes
id	String	PK	—
recordType	String	NOT NULL	Module discriminator
recordId	String	NOT NULL	Target record id
authorId	String	NOT NULL	Profile id
body	String	NOT NULL	Comment text
createdAt	DateTime	default now()	—

Indexes: [recordType, recordId] , [authorId]

Notification

Column	Type	Constraints	Notes
id	String	PK	—
userId	String	NOT NULL	Recipient profile id
message	String	NOT NULL	Display text
link	String?	—	Deep link to record
read	Boolean	default false	Unread badge
createdAt	DateTime	default now()	—

Indexes: [userId] , [read] , [createdAt]

PasswordResetToken

Column	Type	Constraints	Notes
id	String	PK	–
profileId	String	FK → Profile.id, onDelete Cascade	–
tokenHash	String	UNIQUE	Hashed reset token
expiresAt	DateTime	NOT NULL	Expiry
usedAt	DateTime?	–	Single-use enforcement
createdAt	DateTime	default now()	–

Indexes: [profileId] , [expiresAt]

3. Integrity & Index Notes

- **On delete:** record assignee cascade → deleting a profile removes its records; committee creator Restrict; memberships cascade; committee-task assignees Restrict (must clear before deleting user).
- **Soft delete:** deletedAt on all five modules; queries filter deletedAt: null .
- **Auditability:** RecordHistory is append-only (no update/delete in the record flow).
- **Lookups:** composite indexes optimise history/comment feeds per (type, id) and notification unread scans.

4. Migrations

Migration	Content
20260903192525_init	Initial models: Profile, 5 modules, Committee, Membership, Task
20260903200054_add_history_comments_notifications	RecordHistory, Comment, Notification
20260904_add_deleted_at_to_document	Soft-delete on Document (and modules)
20260908_add_soft_delete_and_capa_created_at	Soft delete everywhere + Capa.createdAt
20260909_passwords_and_reset_tokens	passwordHash + PasswordResetToken
